The Brazilian Steel Market

Raw material deposits as a motive for (foreign) investment
CSN builds up strong position in further processing

April 2007

Wirtschaftsvereinigung Stahl
Betriebswirtschaftliches Institut Stahl
im Stahl-Zentrum
The Brazilian Steel Market

Table of Contents

Overview

I. Overall economic situation
1. Restrained development in recent years

II. The Brazilian steel market
1. Market supply: greater dynamism than the overall economy
2. Steel processors: continued robust development
3. Foreign trade: North and South America dominate
4. Raw materials: local supply of iron ore and scrap – coal and coke must be imported

III. Investments and capacity expansions
1. Investments: rapidly rising volumes
2. New capacities: increasingly involving foreign participation

IV. Dynamic corporate development of Companhia Siderúrgica Nacional
(CSN) slows down in 2006
1. Corporate structure and development
2. Considerably reduced production and delivery figures as consequence of several months’ lost production in 2006
3. Reduced sales volumes and increased production costs weaken the earnings situation in 2006
4. Strong market position in further processing enhanced by capital expenditure and acquisition activities
5. International merger efforts remain unsuccessful
6. New construction projects should almost treble steel capacities
7. Expansion of the Casa de Pedra mine allows CSN to export iron ore
8. Further diversification of business activities with cement production

Appendices
Appendix 1: Brazil’s steel balance
Appendix 2: Latin America’s steel trade, 2006
Appendix 3: Existing and planned coke capacities
Appendix 4: Key financial data, CSN, 2002 - 2006
Appendix 5: Summary of corporate history of CSN
Appendix 6: PLANTFACTS: CSN’s main production plants
